# Big Bend Health Care Coalition COVID-19 SITUATION REPORT #21

JUNE 10, 2020

## STATEWIDE CONFERENCE CALL SUMMARY

- Florida has reached 66,000 positive COVID cases and more than 2,700 deaths. Over 1.2 million individuals have been tested in the State of Florida.
- There has been a dramatic increase in testing throughout the state. 32,000 individuals were tested yesterday with a positivity rate of 3.8%.
- Remdesivir remains prepositioned throughout the state for use if needed, and COVID convalescent plasma is still available as well.
- If a hospitalized patient with COVID has received two negative tests between a 48-hour period and are being moved from the COVID unit for continued care, they do not need to be tested again before being discharged.
- Continue to form those regional relationships as they are making a significant impact. Relationships between DOH, Hospitals, Emergency Management and LTC facilities are the top priority.
- Accurate ESS data remains incredibly important. Please ensure when entering this data you are doing so as accurately as possible.

Big Bend HCC Situation Reports will now be going out once a week on Wednesdays.

## ESS INFORMATION FOR REPORTING FACILITIES

- ESS is critically important for the State to anticipate demand in the hospital & sub-acute care setting. This data influences decisions on the need for additional support and equipment requests from federal government.
- Facilities MUST verify and update data once daily.
- ESS is adding more fields daily. Instructions on these new fields available on the AHCA ESS website.
- Hospitals should estimate the number of med surge beds that can be converted to ICU beds. Do not duplicate bed numbers in different categories. Start with highest acuity beds.
- Corporate Representatives can be established to monitor data entry at individual facilities. Contact AHCA for assistance

## SURGEON GENERAL'S PRIORITIES

### Florida's 5 STEPS to Prevent COVID-19

#### 1 STOP INTRODUCTION

Stop Introduction into Florida from out of state.

#### 2 TEST, TEST, TEST

Leverage testing capabilities & work to expand capacity.

#### 3 ELDERLY & VULNERABLE PROTECTION

Protect the elderly by increased mitigation and messaging at assisted living centers, nursing homes, and other special facilities.

#### 4 PREPARE HOSPITALS

Assess the potential impacts and course of action for hospitals and bed capacity.

#### 5 SOCIAL DISTANCING

Continue to message social distancing.
