

COVID-19 SITUATION REPORT #14

MAY 14, 2020

NOW IS THE TIME TO BEGIN THE PROCESS FOR YOUR FACILITY'S AFTER ACTION REVIEW OF YOUR RESPONSE TO COVID-19.

BELOW ARE SOME INITIAL STEPS TO TAKE WHILE THE RESPONSE IS STILL ONGOING:

- Designate a person to lead your organization through this process. Either a senior leader or someone with access to those leaders. Begin identifying key individuals that will need to be involved and get them engaged early.
- Develop an incident timeline, identifying which of your organization's actions took place and list them in chronological order. Include major events that impacted your organization such as stay-at-home orders, or banning elective procedures, etc.
- Take in depth notes on the key operational and leadership options that took place during each time segment. Observations are more reliable than memories, so make sure key staff keep track of their response actions and challenges during the response. This can be documented through the ICS-214 form, or any other uniform process your organization uses to capture important activities.
- Develop a regular process to collect this information. This information can be collected at the staff sign-in / sign-out station if applicable.
- Consider conducting brief AAR sessions, either daily, weekly, or bi-weekly to see what process are working, or those that may need improvement. Be sure to take detailed notes during these sessions as they will be invaluable to documenting those small changes to processes or policies throughout the response.
- Finally, document everything. If its not written down, then it didn't happen.

One Blood is asking for individuals who have recovered from COVID-19 to donate plasma. For more information, click [here](#).

CURRENT* COVID-19 CASES IN BIG BEND REGION *updated as of 5.14.2020 at 7:00pm

COUNTY	TOTAL CASES	HOSPITALIZATIONS
Calhoun	33	4
Franklin	2	0
Gadsden	140	31
Gulf	1	0
Jackson	105	5
Jefferson	28	7
Liberty	199	0
Leon	275	33
Madison	62	4
Taylor	3	0
Wakulla	31	5

ESS INFORMATION FOR REPORTING FACILITIES

- ESS is critically important for the State to anticipate demand in the hospital & sub-acute care setting. This data influences decisions on the need for additional support and equipment requests from federal government.
- Facilities MUST verify and update data once daily.
- ESS is adding more fields daily. Instructions on these new fields available on the AHCA ESS website.
- Hospitals should estimate the number of med surge beds that can be converted to ICU beds. Do not duplicate bed numbers in different categories. Start with highest acuity beds.
- Corporate Representatives can be established to monitor data entry at individual facilities.
- Contact AHCA for assistance

COVID-19 SITUATION REPORT #14

MAY 14, 2020

TROPICAL UPDATE

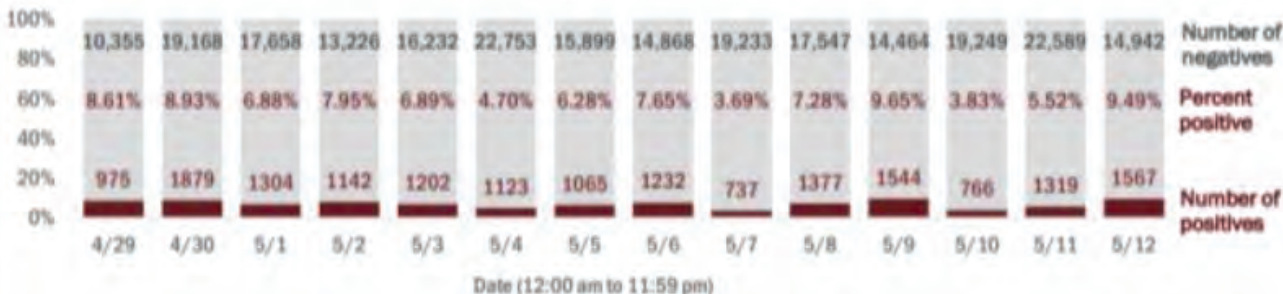

**11:00 AM EDT
THURSDAY, MAY 14, 2020
BAHAMA LOW (70%)**

This update is intended for government and emergency response officials, and is provided for informational and situational awareness purposes only. Forecast conditions are subject to change based on a variety of environmental factors. For additional information, or for any life safety concerns with an active weather event please contact your County Emergency Management or Public Safety Office, local National Weather Service forecast office, or visit the National Hurricane Center website at www.hurricanes.gov.

Number and percent of positive labs

The percent of positive results ranged from 4% to 10% over the past 2 weeks and was 9% yesterday.

These counts include the number of people for whom the department received laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received. If a person has a positive specimen and a negative specimen in the same day, only the positive result is counted.

SURGEON GENERAL'S PRIORITIES

Florida's 5 STEPS to Prevent COVID-19

1 STOP INTRODUCTION

Stop Introduction into Florida from out of state.

2 TEST, TEST, TEST

Leverage testing capabilities & work to expand capacity.

3 ELDERLY & VULNERABLE PROTECTION

Protect the elderly by increased mitigation and messaging at assisted living centers, nursing homes, and other special facilities.

4 PREPARE HOSPITALS

Assess the potential impacts and course of action for hospitals and bed capacity.

5 SOCIAL DISTANCING

Continue to message social distancing.
